

HQSYN16 - Task #3811

Task # 3680 (New): RA4a - Automatic error prediction

Experiment with statistical outlier detection and removal

09.03.2016 15:39 - Matoušek Jindřich

Status:	New	Start date:	09.05.2017
Priority:	Normal	Due date:	14.09.2018
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	RA4: Automatic error prediction and signal modification		
Description			
Subtasks:			
Task # 4205: DNN-based outlier duration detection and penalization			Closed
Task # 4206: HMM-based outlier duration detection and penalization			Closed
Task # 4462: Automatic evaluation of synthetic speech quality by a system based on stat...			Closed
